The Medical Advisory Board is comprised of the medical director of the Center and representative members from each major specialty of the Medical Staff shall govern the Medical Staff as described in the bylaws. The Administrator of the Center may serve as an ex-officio member of the Medical Advisory Board with voice but not vote, except that the Administrator shall not participate in any proceedings or activities of the Medical Advisory Board when it is acting as a peer review and medical review committee.

The Medical Advisory Board shall be a standing committee and shall consist of representatives from each major specialty of the Medical Staff in addition to the Medical Director. Each representative of a major specialty shall be appointed by the Governing Body to the Medical Advisory Board for a term of one (1) year but may be removed by the Governing Body in its sole discretion at any time. The Administrator of the Center may serve as an ex-officio member of the Medical Advisory Board with voice but no vote, but shall not participate in any proceedings or activities of the Medical Advisory Board when it is acting as a peer review or medical review committee. The Medical Advisory Board has been empowered by the Governing Body for the establishment, maintenance, and improvement of professional and quality care. Therefore, the Medical Advisory Board shall encourage and participate in the ongoing monitoring and review of the factors that relate to quality patient care.
